LUKOIL LUBRICANTS ENABLE RELIABLE MOBILITY FOR MILLIONS WORLDWIDE AND PROVE THEMSELVES DAILY UNDER ALL CONDITIONS.

Lubricants are some of the most important technical components of our daily life – and yet they are rarely noticed. And so it should be. After all, safety and progress can only be guaranteed by high-quality products with long service lives that invisibly keep our ever more dynamic world turning smoothly. LUKOIL Lubricants takes its responsibility as a manufacturer of first-class, reliable lubricants extremely seriously. The company's products are used across a range of industries, ensuring the smooth functioning of vehicles as well as boats and agricultural machinery.

In this way, LUKOIL helps keep today's highly complex logistics networks from grinding to a halt – which would be unthinkable in our modern ultramobile society. Nor is coming to a halt an option for the LUKOIL company. Stable growth, securing of resources and steady improvement of products and processes are essential in a highly dynamic market. LUKOIL has therefore established the goal of being at the absolute top in the most challenging segment: fully synthetic, high-performance oils for modern vehicle engines. The development of LUKOIL products for agricultural applications is an impressive and successful example of this strategy – but we are always striving for more.

Founded in 1991 by a merger of regional oil and gas transport companies in the western Siberian cities of Langepas, Uray and Kogalym (LUK), LUKOIL developed into the largest private oil group in Russia. In line with its established creed of vertical integration – in other words raw material extraction, production and development as well as sales of high-quality products all at a single company – LUKOIL always strives to offer perfect service to its customers. In recent years, the focus here has been on the lubricants business.

Through constant development work at seven refineries and production sites in Europe, including the newly added production and filling plant at the oil port of Lobau, LUKOIL Lubricants has already won over more than 300 manufacturers in the automotive industry, especially with the high-quality oils for the critical European market.

The Austrian market is also gaining in importance here. After all, it is from here that LUKOIL serves all Western European countries, not only with production and development, but also with the operation of a highly efficient distribution network. The lion's share of the value creation is therefore situated in Austria – at the heart of Europe. An important signal of stability and a long-term orientation. The decades of experience of Austrian experts in the role of a Central European hub and interface between East and West also ensure smooth functioning of all critical logistical flows. With the Danube port of Lobau and the Vienna Airport, high-capacity transport routes are a given.

LUKOIL AGRI

THE PREMIUM MOTOR OIL FROM LUKOIL IS PREPARING TO CONQUER THE EUROPEAN MARKET FROM VIENNA – WITH HIGH QUALITY AND A SUSTAINABLE BUSINESS MODEL.

Our LUKOIL products for agricultural applications were specially selected to optimally address the operational needs of your machinery. These products satisfy the highest performance requirements and protect YOUR agricultural machinery under all conditions and weather. This is why you should choose LUKOIL lubricants for the best protection of YOUR machinery.

A large yellow excavator is shown working on a steep, light-brown dirt mound. The excavator's arm is extended, and its bucket is positioned near the top of the mound. The background is a clear blue sky with some wispy clouds. The excavator's bucket is a large, silver-colored metal bucket with several teeth at the bottom.

**QUALITY IS OUR STRENGTH.
ENGINES ARE OUR PASSION.**

QUALITY FROM AUSTRIA

In our state-of-the-art production facilities in Lobau, Vienna, as well as in Finland and Romania, we manufacture over 40,000 tonnes of lubricant every year, using first-class source materials. Our scientific experts also work continuously to improve our products to guarantee ever greater reliability and progress.

In this way, LUKOIL can supply customers around the world – even in the most demanding segment of fully synthetic, high-performance lubricants – with reliable and individual solutions for special applications.

IT'S A MATTER OF TRUST.

UNIVERSAL OILS FOR AGRICULTURAL AND CONSTRUCTION MACHINERY

LUKOIL AVANTGARDE 10W

Prod. No.: 567510

SPECIFICATIONS

ACEA E2
API SF/ CF/ CF-2
MAN 270
MB 228.0
MTU Oil Category 1
ZF TE-ML 05K/ 21K

- LUKOIL AVANTGARDE is a mineral, single-grade motor oil for diverse applications.
- Suitable for various engines, such as utility vehicle engines, manual transmissions, retarders, torque converters and hydraulic systems of agricultural and construction machinery
- Also suitable for the lubrication of air compressors
- Usable as a detergent compressor oil
- Suitable for use in heavy duty, charged diesel and petrol engines

- Special lubrication oil with good clinging properties for use in the wood processing and saw industry

- Lubrication of chains, conveyors and transport equipment as well as slideways and guideways on wood processing machinery

- Prolonged lifespan thanks to reduced wear, lowers lubricant consumption and maintenance requirements, does not resinify

- Protects against rust, corrosion and moisture

LUKOIL BIOCHAIN LIGHT

Prod. No.: 580431

MEDIUM

Prod. No.: 580432

HEAVY

Prod. No.: 580433

- Biologically degradable open-system lubrication oils based on rapeseed oil
- Good clinging capacity, reliable friction reduction, good wearing protection, economical consumption
- Ideally suited for use in open lubrication systems in the wood processing and saw industry
- Good low temperature behaviour

LUKOIL BIOSEGAROL E 100

Prod. No.: 580481

SPECIFICATIONS

- Rapidly biodegrading, environmentally friendly chainsaw oil based on high-quality rapeseed oil
- Reliable wearing and corrosion protection as well as good clinging capacity
- Clings even under cold and damp conditions
- Optimal lubrication of the chain links

ON C 2030
Biodegradable after 21 days as per ON C 1158: > 90 %
