LUKOIL LUBRICANTS ENABLE RELIABLE MOBILITY FOR MILLIONS WORLDWIDE AND PROVE THEMSELVES DAILY UNDER ALL CONDITIONS.

Lubricants are some of the most important technical components of our daily life – and yet they are rarely noticed. And so it should be. After all, safety and progress can only be guaranteed by high-quality products with long service lives that invisibly keep our ever more dynamic world turning smoothly. LUKOIL Lubricants takes its responsibility as a manufacturer of first-class, reliable lubricants extremely seriously. The company's products are used across a range of industries, ensuring the smooth functioning of vehicles as well as boats and agricultural machinery.

In this way, LUKOIL helps keep today's highly complex logistics networks from grinding to a halt – which would be unthinkable in our modern ultramobile society. Nor is coming to a halt an option for the LUKOIL company. Stable growth, securing of resources and steady improvement of products and processes are essential in a highly dynamic market. LUKOIL has therefore established the goal of being at the absolute top in the most challenging segment: fully synthetic, high-performance oils for modern vehicle engines. The development of LUKOIL GENESIS is an impressive and successful example of this strategy – but we are always striving for more.

Founded in 1991 by a merger of regional oil and gas transport companies in the western Siberian cities of Langepas, Uray and Kogalym (LUK), LUKOIL developed into the largest private oil group in Russia. In line with its established creed of vertical integration – in other words raw material extraction, production and development as well as sales of high-quality products all at a single company – LUKOIL always strives to offer perfect service to its customers. In recent years, the focus here has been on the lubricants business.

Through constant development work at seven refineries and production sites in Europe, including the newly added production and filling plant at the oil port of Lobau, LUKOIL Lubricants has already won over more than 300 manufacturers in the automotive industry, especially with the high-quality oils for the critical European market.

The Austrian market is also gaining in importance here. After all, it is from here that LUKOIL serves all Western European countries, not only with production and development, but also with the operation of a highly efficient distribution network. The lion's share of the value creation is therefore situated in Austria – at the heart of Europe. An important signal of stability and a long-term orientation. The decades of experience of Austrian experts in the role of a Central European hub and interface between East and West also ensure smooth functioning of all critical logistical flows. With the Danube port of Lobau and the Vienna Airport, high-capacity transport routes are a given.

LUKOIL GENESIS MOTOR OIL

THE PREMIUM ENGINE OIL FROM LUKOIL IS PREPARING TO CONQUER THE EUROPEAN MARKET FROM VIENNA – WITH HIGH QUALITY AND A SUSTAINABLE BUSINESS MODEL.

With the expansion of the Vienna production site and the associated strict quality controls, LUKOIL is sending a strong signal for the quality standard of LUKOIL GENESIS. As a home for modern technology enterprises, Austria also guarantees a product that not only meets the strict quality, environmental and ethical standards in Austria but subsequently throughout Europe as well.

As a fully synthetic Engine Oil, LUKOIL GENESIS meets all the requirements of modern petrol and

diesel engines. Especially with regard to ever higher performance, more efficient consumption and, not least, fulfilment of the strictest environmental standards, selecting the right Engine Oil has now become a critical decision. And not only for OEMs, particularly in mid-range and luxury vehicles, but especially at maintenance and service centres.

LUKOIL is working to ensure that GENESIS is available at all retailers, service stations, workshops and fuel stations.

**QUALITY IS OUR STRENGTH.
ENGINES ARE OUR PASSION.**

QUALITY FROM AUSTRIA

In our state-of-the-art production facilities in Lobau, Vienna, as well as in Finland and Romania, we manufacture over 40,000 tonnes of lubricant every year, using first-class source materials. Our scientific experts also work continuously to improve our products to guarantee ever greater reliability and progress.

In this way, LUKOIL can supply customers around the world – even in the most demanding segment of fully synthetic, high-performance lubricants – with reliable and individual solutions for special applications.

IT'S A MATTER OF TRUST.

+ 1 LITRE AT EVERY SERVICE

WHY YOU SHOULD OFFER EVERY CUSTOMER AN ADDITIONAL LITRE		ADVANTAGES AND ARGUMENTS FOR YOUR CUSTOMERS
 DURING AN OIL CHANGE		Avoidance of technical problems – the right oil is always used
		Service providers know the right oil quality; an unsuitable oil could void warranty claims
		Extended oil change intervals require special oils that are often not available at petrol stations
 UPON PURCHASE OF A NEW CAR		The operating manual contains recommendations concerning top-up quantities
		Extended oil change intervals require special oils that are often not available at petrol stations
		Service providers know the right oil quality; an unsuitable oil could void warranty claims
 AT ALL SERVICE VISITS		Oil level checks are important since 32% of vehicles operate at too low a level, which can lead to engine damage.
		Safety on the road

WHICH ENGINE OIL DO I NEED?

Information on the individual car brands can be obtained in the LUKOIL Oilfinder at www.lukoil-lubricants.eu or requested by email: technics.lubes@eu.lukoil.com

LUKOIL TRANSMISSION

Fully synthetic transmission oils developed for hard-working transmissions.

LUKOIL GENESIS SPECIAL

Your car deserves the best Engine Oil, treat it well.

LUKOIL COOLANT

We offer a wide range of radiator antifreeze fluids for diverse specifications and needs – whether pure or diluted.

LUKOIL ATF

Our range of automatic transmission fluids covers every need.
